

# professional installation

## Professional Basic Installation Includes:

- Attachment of the wireless antenna to your home or business with the necessary hardware and weather sealed.
- The necessary hardware to mount and ground the wireless antenna.
- Up to 100 ft. of cable from the wireless antenna to inside of home or business.
- Routing of all cables to one computer or network termination point through an outside wall.
- Set-up and configuration of 1-2 computer(s) and firewall with pre-installed Ethernet card.
- Configure 1-2 computer(s) email clients with @kdsi.net accounts.
- Any labor necessary to hide cable or display cable in a fashionable manner throughout the home or business.

For an additional charge, Custom Installation is available.

### This can include:

- Ethernet card installation.
- Additional ethernet cabling.
- Routing cable through more than one wall or wall fish.
- Enhancements to an existing internal network.
- Hookups to multiple computers (in home) or other various components.
